DETAILED ACTION

Allowable Subject Matter

1. Claims 1-14 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art does not disclose or suggest applicant's invention claimed as a method, the invention characterized by the claim limitations, highlighted by steps of 1) providing a device comprising a microdroplet transport channel having at least one hydrophobic region and a gas port in fluidic communication with the channel, 2) introducing a first volume of liquid into the channel such that the first volume is confined by at least one of the hydrophobic regions so as to create a first terminus, and 3) introducing a volume of gas through the gas port into the channel under conditions that the gas divides the liquid in the channel so as to create a second terminus, the first a second terminus defining a second volume of liquid.

Applicant's claimed methodology is useful for movement and dispensing of accurate microdroplet volumes, such a nanoliter or picoleter sized droplets containing biological samples to, for example, initiate biological reactions.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The references cited relate to microfluidic handling of microdroplets, yet none disclose applicant's inventions as characterized by generic claim 1.
